

Who We Are

Nektaria Piston Int'l Limited is an upstream and midstream oil and gas contractor committed to delivering quick, reliable service. Based in Lagos, we specialize in supplying essential equipment, products, and materials across the exploration, production, and transportation phases of the oil and gas industry.

We provide support across the entire oil and gas supply chain.

Construction

Welding

Exploration

Drilling

Extraction

Transportation

As a trusted partner in the upstream (exploration and production) and midstream sectors, we solve complex technical challenges, ensuring that our clients maintain operational efficiency.

Managing Director

Our Ethics & Code of Conduct

At Nektaria Piston, integrity is at the core of our business. Our core values—Do What's Right, Respect Others, and Perform with Excellence—define how we operate and guide every decision we make.

Our Code of Ethics and Business Conduct sets high standards for all employees, contractors, and board members, emphasizing ethical behavior and a commitment to integrity. We uphold a zero-tolerance policy for corruption and unethical practices, holding ourselves accountable to the highest moral standards, even when not required by law.

Why It Matters

Maintaining the trust of employees, customers, and stakeholders is essential for long-term success.

Key Principles:

- Follow the law and the spirit of all applicable regulations.
- Report violations and cooperate in investigations.
- Complete required training to ensure ethical decision-making.

What We Do

Encourage colleagues to uphold our values. We are proud to provide comprehensive services within the upstream and midstream oil and gas sectors.

Our services are strategically designed to support oil and gas companies in all stages of the supply chain.

Service Areas

As an engineering, procurement, and construction (EPC) company, our clients rely on our ability to deliver comprehensive and integrated solutions for their maintenance and capital project needs.

The services we offer include:

- Field Services
- Electrical and Instrumentation
- Engineering
- General Construction
- Fabrication and Modules
- Insulation and Scaffolding

Business Areas

Procurement & Material Management

Material management is a critical part of the supply chain. We help companies maintain the flow of materials and services needed to operate, while minimizing inventory costs and losses. Our materials management services implement and execute the process of planning and controlling the flow of materials, including:

Procurement: Planning and purchasing materials

Supplier selection: Evaluating and selecting suppliers or vendors

Inventory management: Maintaining a company's stock of materials

Warehousing: Storing materials

Shipping: Shipping materials

Quality control: Ensuring materials meet quality standards

Distribution: Distributing materials

Our team of engineers and technical experts specialize in sourcing and procuring goods, tools, and equipment for our clients in the oil and gas upstream and midstream sectors. We focus on ensuring the timely delivery of critical components for manufacturing, construction, exploration, production, and transportation projects to support efficient project completion.

Project Management

Every contract and bill of quantity is strategically managed with project management processes, methods, skills, knowledge, and experience to achieve specific project objectives according to the project acceptance criteria within agreed parameters. Nektaria Piston uses an internal framework to monitor and control projects so that they are completed within the constraints of the finite timescale and budget. Our project management approaches are as follows:

Project scheduling:

Ensuring timely delivery of materials to the project site is essential for maintaining project timelines and avoiding delays caused by material shortages.

Quality assurance:

Proper material management includes quality checks to ensure all materials meet project specifications, enhancing the overall quality of the finished product or contract.

Inventory control:

Tracking and managing the inventory of materials helps to avoid overstocking or running out of crucial materials, both of which can disrupt project progress.

Supply chain management:

Building strong relationships with reliable suppliers and managing the flow of materials from procurement to delivery is critical for smooth operations.

Clients or customers enjoy the benefits of our talented professionals when we handle a project or task because every work or job is executed properly and thoroughly.
